

ICON
DIGITAL JUKEBOX WALL MODEL
POWERED BY ECAST

ICON Digital Jukebox (Wall Model)

Designed to be lean, mean, affordable and reliable, the NSM Icon is the smallest self-contained jukebox on the market today. Weighing in at only 68 pounds, it offers unprecedented ease of installation and all around efficiency. Plus, with Ecast's Easy Connect wireless broadband, the Icon can be downloading music and earning money within an hour from taking it off the truck!

Available in a variety of easily changeable colors, the stylish design makes the Icon at home in a bar or a high-end nightclub. A generous 19-inch Ecast MoJO™ touchscreen helps bring in bigger earnings (when it comes to the screen, size does matter!), connecting the box to the Ecast network and the many benefits provided by the industry's first and only 100% broadband jukebox network.
